CMYK

A CMYK color is only a reference color and may appear different depending on where it’s shown. A printer or a computer screen may have different colors settings. Also observe that colors may appear different depending on the color, the surface and the material of the product. We can never guarantee exact CMYK colors.

This proof only illustrates the placement and proportions of the marking and should be considered as an indication of the final product. We take no responsibility for errors not corrected.
